Technical due diligence on turbines in Germany

Dreisler:

Technical due diligence on several smaller wind farms in Germany

Ambienta:

Offshore update report, market outlook

Triton:

Technical and technology due diligence on a major turbine controller manufacture

Kentech:

Technical review of turbines for acquisition in Germany

Momentum:

Technical review of turbines for acquisition in Germany

Bord Gáis:

- End of warranty inspection of several larger wind farms in Ireland and UK
- TOC inspection of new wind farms in Ireland

OWEC Tower:

Development and writing the master business plan

Mekanord:

Framework agreement on gearbox exchange and inspection

Numerous executed assignments

Bicakcic:

Wind and Site reports on several projects for feasibility study in Bosnia

Dansk vindmølle service:

Framework agreement for Endoscopic inspections. Worldwide.

Nordex:

Endoscopic inspections
Blade inspections
Blade repair

Standard life:

Report on cost development and trends in the OMS market

McKenzie & Company:

Status report on commercial and operational parameters of a major turbine manufacturer.

BAN:

Feasibility study for offshore wind farms in the UK

Honiton:

Performance update report for wind farms in Inner Mongolia

Boston Consulting Group:

Assisting in structuring EPC and OMS contract procedures and layout

UL DEWI

EOW Inspections on 30 Vestas V112/3MW in México

UL DEWI

EOW Inspections on 15 Vestas V112/3.3 MW in Santo Domingo

Various customers:

Phased Array Scanning (ultrasound) blade root scans on more than 400 Gamesa G47 and Vestas V47 turbines

Uniwindet:

Rotor inspections on 49 Suzlon S88 turbines in Spain

DMP:

Turbine inspections

Nordic Development Group:

Project advisory

Silverlake:

Technical evaluation of operational wind farms.

..... And numerous other projects
